Education Report
September 2020**

FOR INFORMATION

I attended the BASEM Education Committee meeting at the end of August and I have had calls with the BASEM Education leads as well with Kristen Clements about the NCSEM-FSEM UK conference.

Most conferences have been rescheduled for next year, on the whole utilising the same speakers. There will be an FSEM UK session at the Annual Conference

Conferences planned:

- a. BASEM Spring conference:
Provisional Dates on hold at Nottingham: 18th March 2021 – Rescheduled Hip & Groin Day from 2020 - may revert to a virtual conference 17th March 2022
- b. Annual Conference
11-12th November 2021 - Dates and venue set for Brighton 2021 (Rescheduled content from 2020) - FSEM UK will have a session for Exercise Medicine/Moving Medicine and possibly to cover return to sport after COVID (although this may be well covered by October 2021).
Milton Keynes Dons FC November 2022
- c. FSEM UK-NCSEM conference
29th April 2021, Sheffield *From Science to Services*, (How cutting-edge sport, exercise and physical activity research is driving improvements in healthcare). Agenda confirmed.

SEM registrars may be invited to host a session - I've asked for guidance and expectations on this.

FOR APPROVAL

No approval sought at this time

Summary Report

Report submitted on all recent education activities and plans going forward.
