

New Organisation's Proposed Membership Structure

The Specialty of Sport and Exercise Medicine encompasses Exercise Medicine, Musculoskeletal Medicine and Team/Athlete Care.

The Horizontal sections recognise that within the organization there are those who are interested **and** qualified in all 3 domains (Members and Fellows and those on the Specialist Training Scheme), whilst others will be interested in only one or two of the domains and hold qualifications in these, having passed the relevant Faculty Diplomas. They will find their home in their Diplomate Section(s).

The vertical sections allow for Committees bringing together those passionate in each domain – Exercise Medicine, MSK Medicine and Team Care. These will contain representatives from the Horizontal Sections – Fellows, Members, and Diplomate Members of each specific domain.
