

Musculoskeletal Medicine Committee Member Role Description

An exciting opportunity has become available as we look to recruit members for the new Musculoskeletal (MSK) Medicine Committee for the Faculty of Sport and Exercise Medicine UK.

The Role:

We are looking to recruit our brand new MSK Medicine Committee. We are searching for Fellows, Members or Diplomate Members with experience in primary and secondary care, and current or recent experience of delivering MSK services. As the professional membership organisation for Sport and Exercise Medicine within the UK, a key objective of this committee will be to help increase our influence within the NHS across the four nations. This involves working with national partners to develop collaborative models for both musculoskeletal care and physical activity for integrated care systems. The aim of this committee is to work to support this objective.

Commitment:

- The MSK Medicine Committee will meet four times a year, with the first meeting likely to be an in-person strategy meeting and thereafter online meetings.
- You may also be asked to attend meetings on FSEM's behalf such as MSK Partnership meetings, ARMA, or ad-hoc meetings and conferences.

For more information please email membership@fsem.ac.uk or apply [here](#) by Sunday 24th November 2024.
