Applications close on Monday 17th March at 5pm.

ABOUT MOVING MEDICINE

[Moving Medicine](#) is an award-winning initiative of the Faculty of Sport and Exercise Medicine UK (FSEM) aimed at improving health through physical activity. It provides healthcare professionals with practical tools and evidence-based resources to promote physical activity in clinical practice. Moving Medicine is our free, award-winning initiative, designed to provide clinicians and allied health professionals with accessible, evidence based, condition specific information to help give advice on physical activity at all stages of a patient's treatment pathway.

We are expanding our impact through the development of additional Moving Medicine resources for patients. This will include managing the build of a new patient facing Moving Medicine website; the development of resources with our Moving Medicine Clinicians and partners; and working closely with our partner organisation Nuffield Health to demonstrate social impact.

The full project is contingent on funding, but if successful the role will also include managing a new project with external partners to support patient pathways to support people making informed choices to participate in physical activity. We will be developing a cross-sector

approach, guided by people living with long term conditions through policy, standards, training and education resource, data and communication.

We are seeking an experienced and motivated Project Manager to join our dynamic team.

KEY RESPONSIBILITIES

Project Development and Delivery

- Manage the planning, implementation, and delivery of Moving Medicine projects associated with the partnership.
- Monitor project timelines, budgets, and milestones to ensure successful outcomes.
- Work closely with the Moving Medicine team, Nuffield Health, and other stakeholders to align objectives and ensure cohesive delivery.
- Be responsible to the various stakeholder Steering Committee(s) for the day-to-day management of each Project; and be responsible for implementing decisions taken by the Steering Committee.
- Be responsible for the financial administration of each project.
- Monitor the progress of each Project; and prepare progress reports.

People Management, Relationships and Collaboration

- Provide direction, support and clear actions for contributors involved in each project.
- Work collaboratively with external stakeholders
- Represent and fulfil other duties related to the role as may be required including representing the Faculty or Moving Medicine or the partnership at relevant meetings
- Work closely with the Moving Medicine team and contribute to the overall growth and direction of the initiative.
- Support team members in achieving shared objectives and ensure a collaborative approach to all projects.
