

Form 4 – Learning diary

For GPs seeking accreditation as GPwER in Musculoskeletal Medicine with the Faculty of Sports and Exercise Medicine

The learning diary facilitates ongoing learning with reflection throughout the training period of a candidate. No patient-identifiable data must be included. The diary is split into two main sections:

1. **Case-based discussions/review of notes** – should be used to cover relevant musculoskeletal conditions and capabilities as defined in the curriculum, and the capabilities in practice documents (see the appendices of the GPwER framework).
2. **Reflection of continuous professional development (CPD)**, including independent study, teaching or courses attended (all GPwER groups). This can include both clinical and non-clinical learning.

The information in the learning diary will be used in two ways:

- a) **The diary will be assessed as a whole.** Although there is no minimum number of case-based discussions and CPD events that the candidate needs to adhere to, there must be sufficient evidence to satisfy assessors that the candidate undertakes and reflects on a sufficient number of CPD and quality improvement activities. The criteria that will be used are as follows:
 - Reflection on what you learnt from the exercises
 - Reflection on what changes you have made to your personal practice as a direct result of your learning
 - Identification of further learning needs and a plan to address them
- b) Assessors can also use the information provided in the learning diary to support the assessments of the **theoretical and clinical training of the candidate**.
